Email: lakshit.gupta072005@gmail.com
 Mobile: +91-6280493848

SKILLS

Languages:	C, C++, Python
Frameworks:	TensorFlow, Pytorch, Sci-Kit learn, Scrum
Libraries:	NumPy, Pandas, Matplotlib
Tools/Platforms:	Linux, git, GitHub, Docker, Jira, Vs Code
Soft Skills:	Problem-Solving, Team Player, Leadership, Communication

INTERNSHIP

PROXMED PTY LTD PROXMED PTY LTD	June 2024 – July 2024
Informatics Engineer Intern	
- Gained hands-on experience in processing and analyzing 500+ real-world MRI and CT scans, building a strong foundation in medical imaging workflows and preprocessing techniques. - Developed practical skills in handling DICOM medical imaging data on Linux, including viewing scans and interpreting associated metadata. - Collaborated with clinical stakeholders to translate diagnostic requirements into scalable ML workflows. Tech Stack: Pytorch framework, Python, Linux	

PROJECTS

CareerRAG GITHUB	Since Mar 2026
- Engineered CareerRAG, a Retrieval-Augmented Generation system that analyzes resumes against job descriptions using LLMs and semantic search for personalized insights. - Designed an end-to-end pipeline with document ingestion, vector retrieval, and validation scoring to generate structured match reports and improvement recommendations. Tech Stack: Python, Groq API, FAISS, PyMuPdf	
Drone Audio Detection System GITHUB	Apr 2025 – May 2025
- Built a real-time deep learning pipeline for drone vs noise classification using CRNN and YAMNet, handling live audio streaming with 16kHz resampling, feature extraction, and chunk-wise inference, achieving sub-200ms latency per prediction. - Implemented a stacked ensemble decision pipeline combining CRNN and YAMNet prediction scores using an XGBoost meta-classifier, improving F1-score by 7% and reducing false positives by -11% under noisy and low-volume conditions. Tech Stack: Python, Pytorch, Yamnet, CRNN, XGBoost	
Autonomous Drone Detection System GITHUB	Jan 2025 – Apr 2025
- Developed an AI-powered Autonomous Drone Detection System for real-time identification and classification of drones using live video feeds. - Executed advanced computer vision models including YOLOv8, ResNet50, and an ensemble of One- Class SVMs, achieving over 90% detection accuracy across diverse environments. Tech Stack: Python, Pytorch, NumPy, Pandas, YOLOv8s, ResNet50, SVM	

CERTIFICATES

Summer Training in DSA – AlgoTutor	July 2025
Exploratory Data Analysis - Coursera	Mar 2024

ACHIEVEMENTS

Innovators' Choice Award (Engineering)	Apr 2025
Among 200 teams from Engineering domain	
Patent Published IPR INDIA	Mar 2025
Indian Patent Office	
Application Number: 202511035496	

EDUCATION

Lovely Professional University	Punjab, India
Bachelor of Technology - Computer Science and Engineering; CGPA: 8.53	Since Aug 2023
Delhi Public School	Jalandhar, Punjab
Intermediate; Percentage: 85	Mar 2021 - Mar 2023
